

MOI ATT^x (Reactive Load/Attenuator)

Overview

- Passive reactive load/attenuator
- Single step less volume control
- Based on 4x12 cab (G12M) impedance curve
- 2Ω-4Ω-8Ω-16Ω models available

Benefits

- Simplified design for easy set up and lower cost
- Full reactivity at all levels
- Completely passive, requires no power

Safety

- Automatic load mode (disconnect speaker cable)

Specifications

IMPEDANCE	SPEAKER	LINE OUT	CONTROLS	POWER HANDLING
